

Design and Manufacture of Special Jaws

In house Design

In a perfect situation all applications would be covered by standard chucks and jaws, in reality to get the best performance or because it is technically impossible to hold the workpiece with standard products it is often necessary to use specifically designed chucks and jaws. This is where Thame ask you to let our specialist design engineers look at your problem and offer the optimum chuck and jaw solution. We will analyse your equipment and manufacturing operations to develop a specific recommendation to suit your workpiece.

Special Jaws

We have over thirty years experience and know-how in the design and manufacture of special jaws. Every year we design and produce hundreds of innovative solutions to help our customers increase their productivity. This specialist knowledge is at your disposal, please try our service and join the large number of our customers who return time and time again because they are satisfied with the end result.
